

IC-M24

FEATURES

Float'n flash*

With its innovative flashing red LED light, an overboard IC-M24 is easy to find, day or night. The light flashes even if the radio is turned off.

* US patent pending.

Small and lightweight body

As a floating VHF marine transceiver, the IC-M24 is small and lightweight and easy to carry around.

Energy-saving 3.7V circuitry

The IC-M24 is powered by the 3.7V Lithium-Ion battery pack, BP-266, to reduce the volume and weight of the radio. A newly developed PA circuit provides 5W (approx.) RF output and powerful 600mW (typ.) audio even at this low voltage, while saving battery consumption for 10 hours of operating time.*

* Typical operation with Tx (Hi): Rx: standby=5:5:90. US patent: 8,295,796.

Easy to see large LCD

The large, easy to see LCD (32×16 mm) offers a clear 2-digit channel number indication.

Built-in regular charger circuitry

Recharge the IC-M24 by plugging the wall charger directly in to the radio. By eliminating exposed metal charging points, the IC-M24 is even more protected from water damage.

Volume loud and mute functions

The volume loud/mute functions temporarily change the volume to the maximum/minimum level with two touches of a button. Depending on the background noise level, you can easily change the volume level to capture the received message.

Other features

- Submersible construction equivalent to IPX7 (1m depth for 30 minutes)
- Dual/Tri-watch functions Auto scan function
- One-touch access to Ch 16
- · 4-step battery life indicator
- Tag scan and Favorite channel functions
- Weather channel with weather alert (USA version)
- AguaQuake™ draining function

SPECIFICATIONS

GENERAL Frequency range
